Core Competency

BioArmor™ Our lead product is our hand sanitizer, an alcohol-free, non-toxic antimicrobial hand sanitizer that safely disinfects, killing 99.99% of harmful germs, bacteria and micro-organisms, while keeping hands soft and moisturized with aloe and vitamin B-5.

Bioarmor is vastly different from alcohol based sanitizers which dissipate in a few seconds, leaving skin on hands dry and cracked and open to infection.

Past Performance

BioArmor™ has provided hand sanitizers for use in institutions, pharmacies, laboratories and dental offices. We have also successfully placed **BioArmor™** hand sanitizer for resell in major retail outlets.

Clients

- Bed Bath and Beyond
- CDC (Center for Disease Control) Laboratory
- Cannon Pharmacies
- Charlotte Latin Schools
- Turner Orthodontics

Differentiators

- **BioArmor™** is superior to its competition due to its alcohol-free antimicrobial formula and focus on skin moisturizing using, plant based aloe and vitamin B-5.
- **BioArmor™** provides a physical kill ensuring that microorganisms do not adapt or become resistant to our proprietary formula as may occur with other hand sanitizers.
- **BioArmor™ Value:**
 - 50 ml foam bottle dispenser provides 125 applications.
 - 210 ml foam bottle dispenser provides 500 applications.

Please visit **BioArmorGlobal.com** or call 704-419-4800 for more information including efficacies and safety data sheets.

BioArmor™ label and FDA information can be found on the website DailyMed.gov.

Other **BioArmor™** products under development include:

- EPA Approved, Hospital Grade
Multi-purpose Disinfectant Cleaner
- Plant Based Biodegradable Degreaser
- Oral Hygiene Organizer
